

## It is the most important of all.....Cleaning & Hygiene

We use effective cleaning materials in the house incorporating antiviral disinfectant as certified to European standards EN1276 & EN14476

We have increased the cleaning frequency of all high touch points in communal areas to stop viral spread through the house

Your room is left 'empty' by us for 24 hours before you arrive providing you with additional confidence of the safety of your room

All our bed linen and towels are laundered in line with appropriate guidelines to fully sanitise and kill viruses

We have hand sanitiser stations located in the hallway and dining room for you to use to stop any viral spread

Anne & Andrew have a full understanding of the need for thorough cleaning, hygiene and social distancing

## We should all remember to carry on Social Distancing

We have initiated and practice appropriate social distancing measures throughout the house

We have revised our check-in procedure to ensure social distancing guidelines are maintained

We have PPE available for use when appropriate. Whilst there is no Government guidance on the need to wear face masks or coverings in guest houses these are available and will be worn when we consider it is necessary to do so

## It is safer not to touch.....our Contactless Procedures

In order to reduce viral spread Anne & Andrew will not enter your room during your stay unless it is necessary to do so

We have initiated new antivirus spread measures during our room payment process to allow you to use your debit card

**We do need the co-operation of all our guests to help us stop the spread of the Covid19 virus so that we can all enjoy a confident, safe, healthy, and relaxing stay at Badgers Wood**
